

Online Proctoring with a Human Touch

Honorlock provides on-demand proctoring services for academic institutions worldwide. Our patented, proprietary technology transforms an otherwise intrusive interaction into a positive experience promoting trust, confidence, and peace of mind. Here are a few ways we stand out from the rest:

Live Proctors When You Need Them

Honorlock offers a hybrid proctoring system that combines the benefits of automation with those of a live proctor. With Live Pop-In™, we prompt a live proctor to pop in during a session if the student triggers our automated system with suspicious activity. Live Pop-In is the new live proctoring service—only better—because Live Pop-In is geared toward prevention. Our live trained proctor is intervening just in time to prevent suspicious activity from going further. If the student accidentally prompted the Live Pop-In, the proctor will help them get back on track with their exam. Faculty save a substantial amount of time when reviewing the assessment report because they don't have to review false flags.

Protect Your Proctored Online Exam Content

Search and Destroy™, our proprietary test bank removal technology searches for and destroys unauthorized copies of your test questions on the internet. Once you enable Honorlock in a proctored online exam, our software automatically searches for leaked assessment content. It then requests the

removal of the material from third-party websites by filing DMCA copyright takedown notices. As an added protection measure, we also allow you to prevent students from copying, pasting, and printing during the proctored exam. We give instructors the confidence of knowing they won't have to create new test questions each semester.

Detect the Use of Unauthorized Secondary Devices

As students have access to more and more devices, it becomes harder for instructors to preserve academic integrity—especially in a remote testing context. We're proud to have the industry's first and only technology to detect cell phone, tablet, and laptop use while a student is taking an online proctored exam. Our patented system can detect when these devices are accessing test bank content during an exam, and we capture a screen recording of the secondary device to provide evidence in the event of a violation. This remote proctoring function deters students from using their phones out of view, and you get to proctor beyond the webcam, protecting the academic integrity of your online exams.

Proctor Third-Party Exams Seamlessly

When faculty need to administer exams outside of your LMS, you're looking for solutions that provide effective evaluation while preventing academic dishonesty. Now Honorlock will set your institution apart by delivering proctoring services within third-party exam systems such as MyMathLab, ALEKS, Pearson and McGraw Hill. Faculty can easily register third-party exams and customize exam settings in your LMS. Students can access and launch the exam with a few simple clicks. You can rest assured that all exams—even those outside your LMS—are proctored effectively to protect academic integrity.

Block Access to Websites and Applications

Browser Guard™ allows you to deliver your tests securely without requiring students to download a bloated custom browser. Once a student installs the Google Chrome extension and begins the exam, their web browsing will be restricted and recorded, preventing access to unauthorized web content, unapproved applications, and multiple monitors. The Honorlock system takes a screen recording while the student is testing so you can see everything they're seeing. You can also allow access to websites you'd like students to be able to access during the test, and you can allow them to access some applications—like an on-screen calculator. Even when you aren't there to proctor the exam, you get to control the testing environment while giving your students the freedom and flexibility of using their everyday browser.

About Honorlock

Honorlock is revolutionizing the way education institutions protect the academic integrity of online courses and assessments. Honorlock's proprietary features—Live Pop-In, Multi-Device Detection, and Search & Destroy—allow educators to focus on what is most important: their student's success. Honorlock is dedicated to providing world-class service and support 24/7/365.

OTHER FEATURES AND BENEFITS

24/7/365 Support

World-class email, chat, and phone support.

Quick and easy setup

Instructors can easily enable an exam for proctoring with a simple two-click process, and it's just as easy for the student. It typically takes less than 60 seconds for the student to complete the authentication process and start the exam. We also provide a simple single click test that will confirm OS, browser version, and appropriate internet speed.

Real-time recording

The exam session can be viewed by the instructor after the exam. Any incident or suspicious activity will appear in the instructor's dashboard in real time.

Allowed Site URLs

Allows faculty to give students permission to visit specific websites while restricting them from visiting unauthorized websites during their exam session.

On-demand proctoring

No scheduling, no software, no headaches. Students can take proctored exams any time.
