

A Right Fit for Education

Ongoing disruption is accelerating Education's need for new service level agreements with students and staff to ensure EVERY need is efficiently and sufficiently met.

Your Partner for Operational Transformation

The enterprise-level value of electronic forms, workflow automation and document management is rapidly becoming clear, as institutions across Education extend their utilization of Enterprise Content Management (ECM) to implement needed process improvements. At the same time, focus is shifting beyond right-fit ECM solutions—landing upon right-fit ECM vendors. Here are a few reasons why Softdocs should be your trusted ECM partner moving forward:

INNOVATIVE TECHNOLOGY

Solution suites of some ECM providers consist of client-server applications that are reliant on individual desktop installations, providing limited browser-based functionality and minimal support for mobile devices. Softdocs solutions are different. In fact, the Softdocs solution suite was designed, and is constantly being advanced, with the needs and processes of the Education space as the key focus.

Architected for the cloud, and featuring a platform-responsive design, **Etrieve by Softdocs** combines content management, electronic forms and workflow automation functionality into a seamless ECM experience for every user. Built on the latest technology leveraging HTML5, Etrieve runs on any browser, platform and device, allowing your students and employees to securely and conveniently access the content they need, wherever they may be.

Available as a standalone print customization solution, or to be leveraged in conjunction with your Etrieve deployment, **Serve by Softdocs** delivers the ability to graphically enhance ERP print output with fully customizable document templates, complete with digital delivery and archival capabilities.

ROBUST INTEGRATIONS

The Softdocs solution suite is capable of integrating with Enterprise Resource Planning (ERP) systems, Student Information Systems (SIS), and other trusted campus applications. Extending the benefit of the systems already within your technology stack, Softdocs solutions-when integrated-create new frontline efficiencies, aid in the creation of comprehensive digital records, and support data consistency institution-wide. Over the last 20+ years, Softdocs has not only worked with many K-12 and higher education institutions, but a number of leading ERP/SIS providers in the education space as well, to develop valuable integration points and techniques for the Softdocs solution suite.

CLOUD-FIRST METHODOLOGY

With much of Education routinely seeing significant savings and improved performance by moving key applications to the cloud, Softdocs' cloud-first methodology is particularly noteworthy to institutions seeking an ECM vendor. Through a partnership with Microsoft Azure, Softdocs provides significant improvements in security, disaster recovery and compliance.

PROFESSIONAL SUPPORT AND SERVICES

With a tremendous amount of potential built into the Etrieve and Serve solutions, Softdocs wants to ensure that you-and your end users-achieve the optimal benefit from your Softdocs deployment. From strategic planning and consulting to scheduled health checks and solutions review, even advanced certification training, the Softdocs Professional Services team is invested in your continued success. Support cases are promptly and thoroughly reviewed, discussed and resolved by a team of professionals not only familiar with the details of your deployment, but also with the education space and its processes.

AN EDUCATION FOCUS

Since being founded in 1998, Softdocs has focused solely on serving the education space by designing, developing and delivering the solutions needed to simplify time-intensive processes and bolster the experience enjoyed by institutions' students and staff. Every line of code written, every integration developed and every partnership founded has been to advance the Softdocs solution suite to best support every educational institution that chooses Softdocs as their ECM partner.

We brought in various vendors, talked with them, demos, all of that ... and eventually Softdocs emerged as the clear choice for our institution. During the decision-making process, Softdocs' focus on Higher Education was very distinctive. Softdocs had already cultivated a strong partnership with our ERP provider, developed many valuable integration points and were in the development pipeline for new integration that was recently announced.
