

Kevin Kane

Kevin is the Director of Enterprise Systems at Wesleyan University in Middletown, CT. He oversees contracts, budgets, and staff supporting software platforms critical to university operations, including Workday, Salesforce, PeopleSoft, and dozens of smaller systems. He serves as the project manager for Wesleyan's Workday Student ERP implementation. His track record includes modernizing integration efforts, serving as cross functional technical lead on Workday HR/Finance implementation, streamlining operations, and fostering cross-departmental collaboration.

Prior to his current role, Kevin has been at Wesleyan for over 12 years where he started off as a Web Programmer before moving to manage the Student Systems Team. He largely credits NERCOMP and its programs for enabling his development from technical contributor to being a strategic leader. His NERCOMP exposure started with attendance at the Annual Conference and completing the New Manager Series. Kevin now regularly presents at workshops, conferences, and professional development webinars. He is a Professional Development Coordinator for the Systems and Solutions track and has participated in the NERCOMP mentorship program as a mentor.

Kevin is committed to innovation, community building, and NERCOMP's mission. Above all, Kevin is looking forward to the opportunity to continue serving an organization that has provided him and others with so much over the years, an organization that represents all that is special and great about working in higher education.

Kevin received his bachelor of science degree in Computer Science from King's College in 2004 and his master of science in Computer Science from Southern CT State University in 2020.
